

SUGHOSH DURG

sughosh.sdurg@gmail.com | [LinkedIn](#) | [Portfolio](#) | [GitHub](#)

SUMMARY

Data professional with **3 years** of experience across **data engineering, analytics, and machine learning**. Built **ETL pipelines and Redshift data warehouses** at Eli Lilly powering executive dashboards, and **forecasting and RAG-based document pipelines** at Purdue's Krenicki Center. Passionate about **AI/ML**, with hands-on projects in cloud ML deployment and predictive modeling.

SKILLS

Languages & Database Systems: Python (Pandas, NumPy, scikit-learn), SQL, R, NoSQL, MongoDB

Gen AI/Machine Learning :Supervised Learning, Natural Language Processing (NLP), Time Series Forecasting, Classification, Clustering, Feature Engineering, RAG, LangChain, Transformers, LLMs, A/B Testing

Data Warehousing, ETL & Pipelines: Azure Data Factory, Azure Fabric, Snowflake, Spark, Amazon Redshift, Google BigQuery, Databricks, Apache Airflow, dbt, PySpark, ETL/ELT

BI & Visualization: Tableau, Power BI, DAX, Power Query, Excel, Matplotlib, Alteryx, Seaborn, Data Storytelling

Cloud & Infrastructure: AWS (S3, Glue, EC2, SageMaker, Lambda), Azure, CI/CD (GitHub Actions, GitLab), DevOps

CRM, Tools and Collaboration: Salesforce, Tessitura, Agile, Scrum, JIRA, Git, Unit Testing (pytest)

EDUCATION

Purdue University

Master of Science in Business Analytics and Information Management (STEM Designated) West Lafayette, IN August 2025 – August 2026

B.M.S. College of Engineering

Bachelor of Engineering in Information Science and Engineering Bangalore, India August 2019 – August 2023

EXPERIENCE

Krenicki Center for BA and ML

Data Scientist

August 2025 – August 2026

West Lafayette, IN

- Built an end-to-end forecasting pipeline for **United Way of Central Indiana**, engineering **15+ features** and benchmarking **6 time-series models** with automated best-model selection.
- Delivered **MAE/RMSE diagnostic reports** adopted by nonprofit leadership to guide resource allocation across **48 program initiatives**.
- Designed an ETL pipeline to fetch, filter, and transform **25 years** of 10-K reports from **SEC EDGAR** and a **RAG-based** workflow to build a standardized dataset for benchmarking disclosure trends.

Eli Lilly and Company

Associate Consultant - Business Insights & Analytics

July 2023 – July 2025

Bangalore, India

- Built data warehouse and ETL solutions powering **media monitoring executive dashboards**, reducing manual data preparation by **35%** and partnering with product and analytics teams to surface key insights.
- Improved data models for **Marketing Mix Models (MMM)** by collaborating with cross-functional data science teams, applying statistical analysis and ML techniques, resulting in a **45%** improvement in predictive insights
- Integrated and migrated **5+ disparate data sources** into a unified Redshift data warehouse, defining data quality checks and SLAs that increased data consistency by **30%** and accelerated reporting turnaround by **40%**

PROJECTS

- Real-Time Cold-Chain Analytics Platform:** GCP data platform combining Pub/Sub streaming and Airflow/dbt batch pipelines into a BigQuery star schema, with SCD Type 2 tracking and dead-letter error handling for reliability. Delivered a Looker Studio dashboard for real-time cold-chain shipment risk and temperature-excursion alerting.
- NCAA Tournament Seed Prediction:** Built a stacked ensemble of XGBoost, LightGBM, CatBoost, and Ridge on 81 engineered features across 340 labeled teams to predict all 68 NCAA Tournament seeds. Calibrated the blended scores with isotonic regression and applied the Hungarian algorithm so every seed slot is used exactly once.

CERTIFICATIONS

- AWS Certified Machine Learning Engineer Associate
- Microsoft Certified: Power BI Data Analyst Associate
- Microsoft Azure AI Fundamentals (AI-900)
- AWS Certified Cloud Practitioner

AWARDS & HONORS

- Recipient of Purdue University Daniels School of Business Merit Scholarship
- 3x RISE Award Recipient (2023-2025) and GOSO Platinum Project of the Year at Eli Lilly and Company
